Comprehensive filling systems for aerosols worldwide.

With filling lines installed across every continent, **COSTER AEROSOL FILLING SYSTEMS** has a truly global footprint, further strengthened by the international presence of the **COSTER Group**.

COSTER

Coster Group is the only multinational provider of filling equipment and spray solutions, combining expertise in both components and filling machinery. **COSTER AEROSOL FILLING SYSTEMS** designs and manufactures advanced filling machines supporting customers worldwide. Our growth is driven by sustainability and innovation.

COSTER

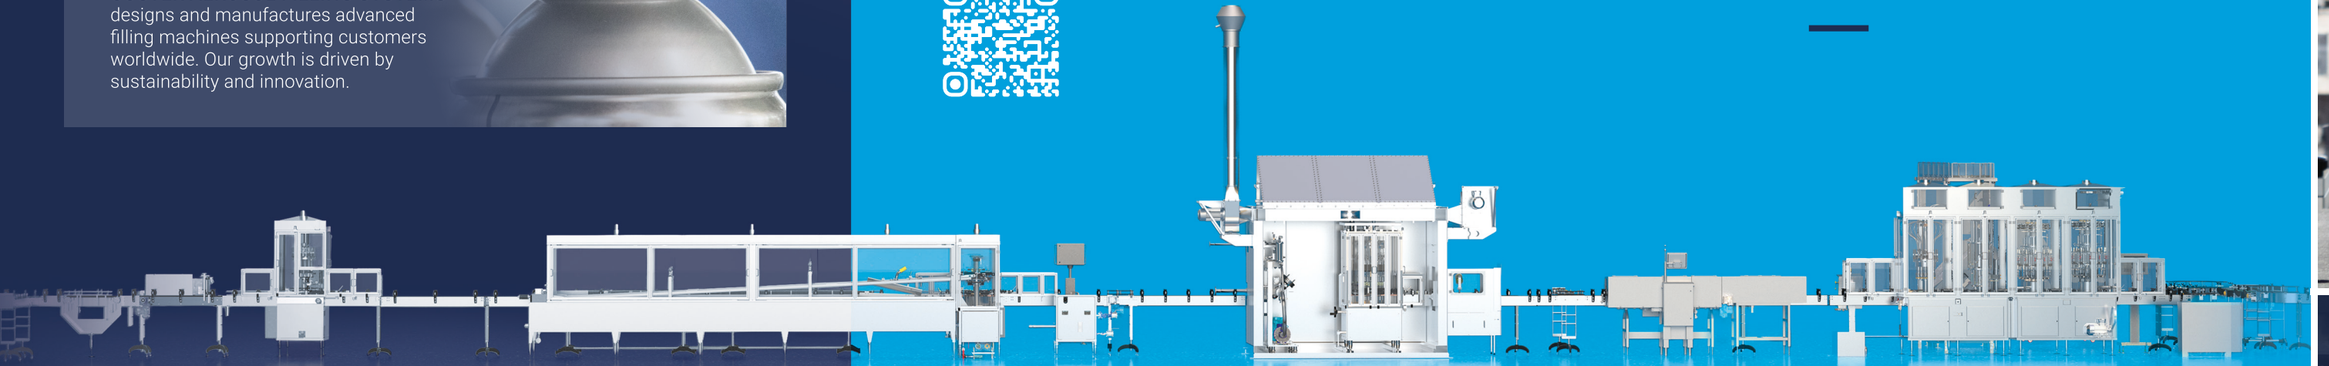

AEROSOL FILLING SYSTEMS

Since 1963 we design custom Aerosol Filling Systems

Filling and placing machines

(Gas, liquid, valves, caps, actuators)

Semi-automatic

10/15 cpm

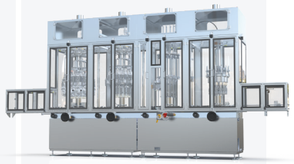

Indexing

Up to **90 cpm**

Up to **180 cpm**
installed in twin

Continuous rotary

Up to **250 cpm**

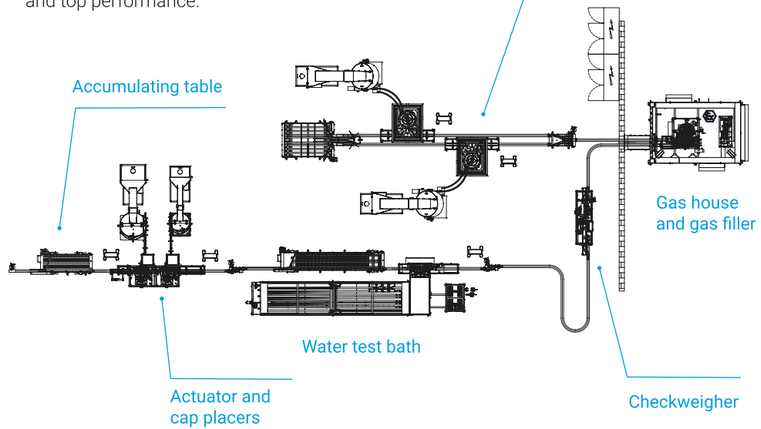

COSTER AEROSOL FILLING SYSTEMS delivers advanced filling technologies for products with both **aerosol valves (1", 20mm and Bag-on-Valve)** and **pumps (no gas)**. Thanks to our extensive expertise with all types of propellants in both ATEX and non-ATEX environments, we support the requirements of all filling industries, including pharmaceuticals, with numerous pMDI lines successfully installed across Europe and around the world.

Complete lines adapted to customer needs

(Including gas room, sorters, bath, checkweigher)

We deliver fully customized filling lines tailored to each customer's production needs.
From indexing to high-speed rotary systems, our full range of integrated ancillary equipment ensures regulatory compliance, product quality, and top performance.

Customer-centric approach

Our teams support you all along the project to bring your ideas to life through concrete solutions.

We focus on your specific requirements, delivering tailored solutions aligned with your goals.

After start-up, our team remains by your side worldwide, providing support for spare parts, upgrades and any other needs concerning machines and lines.
